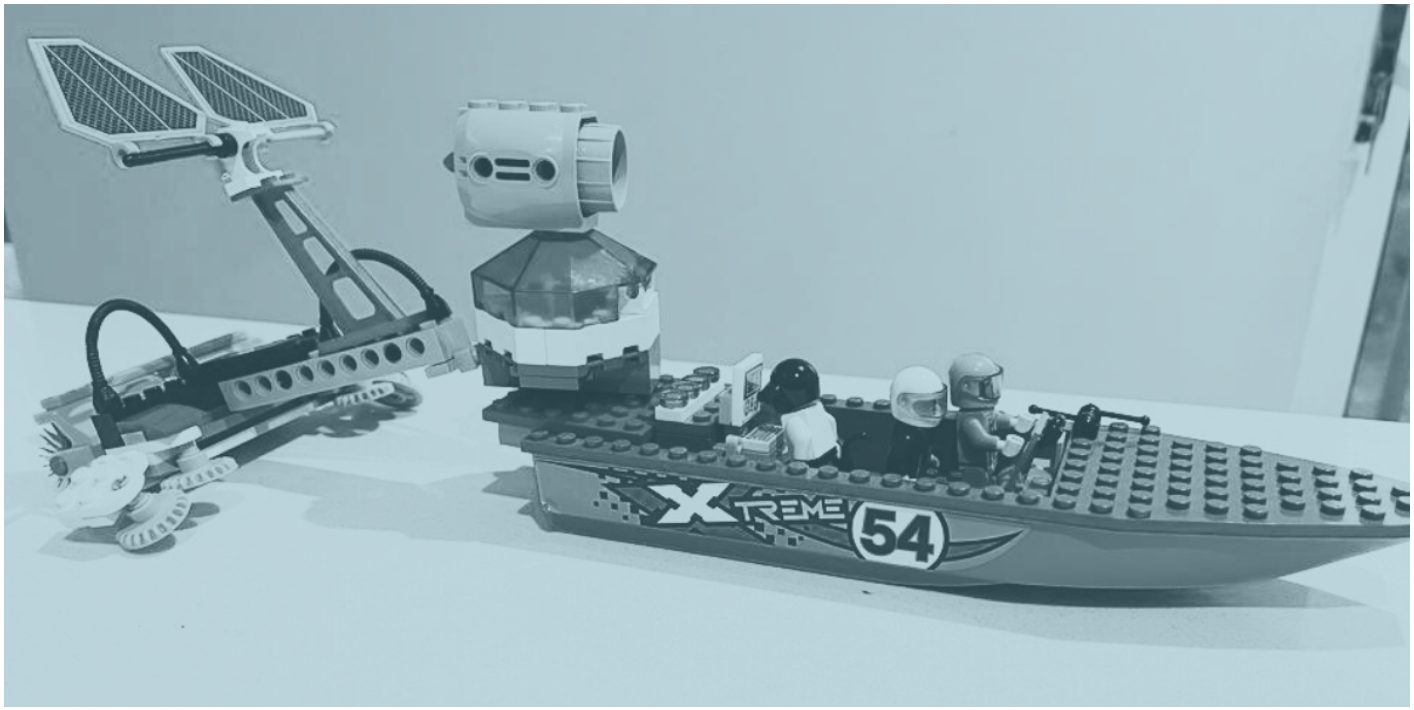
Introducing Austin's River Rescue Rocket!

Author : lewis

Date : 19 January, 2024



A huge thank you to eight-year-old Austin for sending over his brilliant invention, the ‘River Rescue Rocket’, which he created for his class’s science project as a solution to combat river pollution.

Take a read of his proposal below. Every detail has been thought out, even down to a solar-powered engine. Many of us could certainly take a leaf out of Austin’s book. Great job!
